CHEMICAL MANAGEMENT POLICY

OBJECTIVE: To ensure that the chemicals used in Öztiryakiler are managed in a safe, effective, and environmentally friendly manner and to regulate the use of chemicals in line with reducing environmental impacts, improving occupational health and safety, and achieving our sustainability targets.

SCOPE: It covers the supply, storage, use, transportation, and waste management processes of all chemical substances such as acids, oils, lime thinner, flux, and powder and wet paints used in Öztiryakiler.

PRINCIPLES

- **Security:** Chemicals are used appropriately in terms of occupational health and safety and stored in a manner that does not endanger the health and safety of employees. Employees receive the necessary training regarding chemicals, and the use of protective equipment is compulsory when using chemicals.
- **Environmental Responsibility:** The use of chemicals takes place in a way that minimizes environmental impacts. Waste is disposed of without harming the environment. Special storage and disposal procedures apply to dangerous waste.
- **Sustainability:** The chemicals to be used are selected in accordance with sustainability principles. Environmentally friendly, biodegradable, low toxicity, and recyclable products are preferred.
- **Training and Awareness:** All employees are regularly trained and informed on the safe use, storage, transportation, and waste management of chemicals.
- **Traceability and Control:** Traceability of the chemicals used is ensured, and records are kept for each chemical substance. Chemical substance usage data is regularly reviewed and reported.

CHEMICAL MANAGEMENT POLICY

CHEMICAL SUBSTANCE USE AND STORAGE

- **Chemical Selection:** The chemicals to be used are selected from products that do not harm the environment and that pose a low risk in terms of occupational health and safety.

Unnecessary use of chemicals is prevented in production processes.

- **Storage and Labeling:** Chemical substances are stored safely, with appropriate labeling, and in compliance with classifications. Access to the SDS (Safety Data Sheet) document for each chemical is provided, and correct storage conditions and safety precautions are ensured.

- **Usage Amounts:** Chemicals are used only in the required amounts, and overuse is avoided. Effective quantity determination is made to prevent the generation of unnecessary waste.

CHEMICAL WASTE MANAGEMENT

- **Waste Decomposition and Disposal:**

Chemical wastes are separated into hazardous and non- hazardous in accordance with the WASTE MANAGEMENT INSTRUCTIONS and disposed of in accordance with local legal regulations. Waste management processes are constantly monitored and updated to minimize environmental impacts.

- **Recycling:** Wherever possible, used chemicals are recycled or processed for reuse.

CONTINUOUS IMPROVEMENT AND COMPLIANCE

- **Legal Compliance:** Öztiryakiler fully complies with the RoHS directive requirements in addition to respective local and international environmental protection, health, and safety laws and regulations. Legal requirements are constantly monitored by conducting regular inspections concerning chemical substance use and management.

- **Continuous Improvement:** Our chemical substance management system is reviewed every year, and improvement targets are set if necessary. Processes are developed and improvement works are initiated in line with employee feedback and technological innovations.
